
C 开发工程师职位笔试题答案 - 卷 A

参考答案(卷 A)

推荐分值分布:

$$(10 * 4) + (4 * 6) + (10 + 12 + 14) = 100$$

选择 (每题 4 分)

1. D
2. C
3. B
4. AC
5. D
6. B
7. C
8. C
9. C
10. BD

填空 (每题 6 分)

11. 顺序
12. 4
13. 10
14. ACBDFEHGP

编程 (分值 10 + 12 + 14)

15. 内存打印

```
void MemoryDump(char *address, int length)
{
    int n;
    for ( n=0; n< length; n++)
    {
        if( (n&15) == 0 )
            printf("%p:", address +n);
        printf("%02x", (unsigned char)address[n] );
        if( (n&15)== 15 )
            printf("\n");
        else if( (n&3) == 3 )
            printf(" ");
    }
    printf("\n");
}
```

16. 链表反转

```
struct listnode * list_revolve( struct listnode * head )
{
    struct listnode * p ;
    struct listnode * res = NULL ;
```

```
while( NULL != head )
{
    p = head ;
    head = head->next ;
    p->next = res ;
    res = p ;
}
return  res ;
}
```

17. 算法

```
int  FibonacciValue (int  n)
{
    int  i ;
    int  fn, fn1, fn2 ;
    if( n==0 || n==1 )
        return 1 ;

    fn1 = fn2 = 1;
    for( i=2; i<=n; i++ )
    {
        fn = fn1+fn2 ;
        fn2 = fn1 ;
        fn1 = fn ;
    }
    return  fn ;
}
```
